

Stony Brook Medicine Managed Care Network Status Reference Guide

The Department of Managed Care uses reasonable methods to provide accurate and up-to-date information as it relates to Stony Brook Medicine's participation with managed care organizations. Prior to rendering service, always: (i) verify the provider rendering the service is a participating provider with the members benefit plan; (ii) verify the service to be rendered meets the managed care organization or payer's medical necessity criteria and is a covered benefit; and (iii) if required by the managed care organization or payer, obtain authorization for the service. Failure to adhere to this may result in claim denials and/or a higher patient cost share. If the provider is an out-of-network provider, it is important that the following steps are completed prior to scheduling a non-emergent elective procedure or outpatient service: (i) verify the member's benefit includes out-of-network coverage; (ii) verify that the requested service is a covered benefit; (iii) verify the requested service meets the managed care organization or payer's medical necessity criteria; (iv) if required by the managed care
